## NEW CANNERY IS FINE ONE

BAGLEY CANNING CO. PLANT A CREDIT TO TALENT.

### HAS THE LATEST IMPROVEMENTS

The Plant Will Eventually Handle All the Side Products and Will Provide a Market for a Large Quantity of Fruit.

The Bagley Canning Company's plant, which is located at Talent, is just getting fairly started, and although it will be able to make but a short run this season because of various delays, it has already demonstrated that it can produce a high grade class of goods.

The plant, which cost nearly \$10,000 in addition to the site, which was donated by the citizens of Talent, is situated on the east side of the Southern Pacific tracks a short distance north of the village. The fine plant is the outgrowth of a small plant started last year by Dr. W. R. Bagley, at his ranch northwest of Talent. Dr. Bagley, who was formerly one of the leading surgeons of Duluth, Minn., was compelled to give up the practice of his profession because of ill health and settled on a fruit ranch near Talent. His attention was attracted to the need of some method of properly marketing the products of his own and his neighbors' ranches, besides that of shipping the fresh fruit. He installed a small plant and the 1911 product commanded such a ready sale and such a high price that he decided to enlarge the scope of the work, and the Bagley Canning Company is the result.

The buildings are principally of corrugated steel upon a timber frame and include, besides the main work room, a dry and an engine room. The storage will mostly be done in the main building, but Dr. Bagley states that it will undoubtedly be necessary to erect a large warehouse before next season.

The cannery proper is up to date in every respect. It will, on the quart cans, use the sanitary cans entirely. These cans have the cover all in one piece, instead of having a circular cover which is soldered on after the can is filled. The entire top is put on at one operation and the machine in use has a capacity of 20,000 cans in 24 hours. In the gallon cans the usual style of can will be used. The pack so far has been mostly of pears, and within 24 hours after samples were sent one of the leading Portland jobbers, a telegram was received asking how much of that grade could be used. The peach pack started Saturday, September 2, and it is expected that it will last about ten days. The tomato pack will last somewhat longer. In putting up fruit in syrup the exact amount of syrup desired is placed in one dozen cans at once. The machine will feed either the rof two syrups of different strength as desired.

The output of the cannery, when a full crew of expert help is employed, will be about 20 cans per minute, or a carload of 600 cases every 24 hours. The cannery has already orders for about 2,000 cases of canned goods and will undoubtedly have almost the entire pack sold by the time the season closes.

In addition to the cannery feature the plant has an up-to-date dryer which will handle fruit of all kinds. It has a capacity of about 300 bushels of apples in 24 hours. The machinery for preparing the apples for drying is not only up to date but very effective. There are three paring machines, which will each pare and core apples as fast as a man can place them on a spindle one at a time. The machine throws the apple onto an endless belt which carries it to the left to an automatic slicer which slices every apple not only in even thickness but at right angles to the stem. At the same time the paring and the core drop onto another belt which carries them to the right to the cider press. Each paring machine, operated by one man, has a capacity of 75 to 85 bushels per day.

The dryer takes about 24 hours to dry apples, longer to dry pears, and about eight hours to dry prunes. The capacity in prunes is about one ton after drying. The cannery this year had already on Saturday, the 21st, received two cars from Tolo and expected to receive two or three cars of prunes more this season.

The work is under the immediate supervision of Dr. Bagley, assisted by Mr. and Mrs. Lodgeon of Portland, who are experienced in the work.

In speaking of the business Dr. Bagley stated to a representative of the Tidings that to be successful a plant of this sort must be able to take care of the by-products, and also to run on vegetables as well as on fruits. The idea, cannery, he states, should be in operation six months of each year. One of the departments will be that of making cider vinegar, and the cannery expects to work up a reputation for fine bottled goods made from ripe Rogue river apples.

Mr. Bagley clearly foresees that in order for this valley to reach its highest state of prosperity it must be able not only to market its high grade fruit to the best advantage, but to get every possible dollar out of the lower grades, and that without regard to the fluctuations of the market or of the fruit crop. This only can be done by marketing it largely in a non-perishable condition, and this is only possible through canning, preserving or evaporation, as well as by the securing the value of the by-products.

An eight-room school building is being erected at Corvallis in the Avery addition.

### GOLD IN THE LA SAL MOUNTAINS

Report on Investigation Made by United States Geological Survey.

In June, 1911, a reconnaissance of the north end of the northern group of the La Sal mountains, Utah, was made by James M. Hill, of the United States geological survey, for the purpose of ascertaining the extent and value of the ore deposits and the prospects for future development of the region. A report on this work has just been published by the geological survey as Bulletin 530-M, entitled "Notes on the Northern La Sal Mountains, Grand County, Utah."

The La Sal mountains are in the Colorado plateau region, which is characterized by long mesas cut by canyons 2,000 to 2,500 feet deep, with steep cliffs 500 to 600 feet high. Above this relatively level plateau, which has a general elevation of 8,000 feet, the northern group of the mountains rises abruptly at Mount Waas to a height of 12,586 feet.

Two classes of mineral deposits are worked in the vicinity of Basin and Mesa. In the mountains there are several quartz mining prospects and at least one locality where placer gold has been recovered. The quartz mines have made practically no production, and it is probable that \$5,000 would cover the entire output from both quartz and placer mining in the region.

The quartz prospects in the northern La Sal mountains are few in number and the value of the ore is low even at the surface, where many gold-bearing deposits in other districts are enriched. The veins, so far as they could be seen by Mr. Hill, are small and contain much barren quartz. The high charges for transportation to the railroad at Cisco, ranging from \$12 to \$15 for outbound and \$25 a ton for inbound freight, are an additional handicap.

The placers of Wilson mesa are apparently of small extent. They contain only a small quantity of gravel, and all the gold in it cannot be saved by sluicing, because some of it is carried in bowlders, which require some sort of crushing. They include so much material that surely carries nothing of value that it would hardly seem advisable to install expensive crushing machinery unless it were found practical to sort the ore from the waste by hand. Besides these unfavorable conditions only a very small and uncertain supply of water is available for placer operations. The placers contain, however, some free gold that might be procured at a profit if the deposits are worked in a small way.

A copy of this report may be obtained free on application to the Director of the Geological Survey at Washington, D. C.

### POLYTECHNIC COLLEGE NOTES.

The new students this week are Pina Benedict and Volney Sanderson.

The students in stenography are now taking rapid calculations along with Professor Hardy's regular class in commercial arithmetic.

President Gibson returned to Oakland last Friday. He is well pleased with the outlook for the new school. He helped the teachers to get the school in fine running order.

Students may enter any time. October and November will bring quite a body of students; in fact, they will enroll every month in the year.

Mr. Danford presented to the school for the office a fine four-light electric chandelier.

The college had several visitors this week.

The principal now has two excellent places for girls who wish to do light housework for board, while attending school. We wish to give these places to girls from the country or anywhere outside of Ashland.

The year's wood of oak and fir is being stored in the basement. The comfort of the students is assured in rooms that are clean, well lighted, ventilated and heated.

### Albany Girl Wins Place on Faculty.

University of Oregon, Eugene.—Miss Edna C. McKnight of Albany has been appointed assistant instructor in history at the State University. Miss McKnight is a graduate of Albany College, '07, and of the university, '12. She had previously taught in the high school at Jefferson, Ore.

Miss McKnight attracted attention and won high honors at the university last year with her thesis, "Tendencies in Oregon Country Journalism." She made a thorough study of the weekly publications of the last ten years, and noted their continued improvement in business methods and style.

She demonstrated that the country paper of today is doing much more to interest the residents of the districts outside the towns than it was ten years ago, and is an Oregon institution that is in a stage of healthy progress.

An article that has real merit should in time become popular. That such is the case with Chamberlain's Cough Remedy has been attested by many dealers. Here is one of them. H. W. Hendrickson, Ohio Falls, Ind., writes: "Chamberlain's Cough Remedy is the best for coughs, colds and croup, and is my best seller." For sale by Poley's Drug Store.

### Willing.

Husband—My dear, we'll have to economize.  
Wife—Well, let's cut down on our cigars.

SUNSET MAGAZINE and Ashland Tidings one year \$2.75 to old or new subscribers. Regular price of Sunset Magazine is \$1.50 per year.

Telephone your social items to Miss Hawley between 9 a. m. and 4 p. m. each day. Call phone 39.

Florence will raise \$7,500 subsidy to enable the Porter Bros. sawmill to operate on a large scale.

### TALENT ITEMS.

Quite a number attended both the M. E. conference at Ashland and the county fair at Medford. The fair was a success. The exhibits were good and the races very well attended. G. A. Morse of Talent got some first and second prizes on horses, J. F. Norman got first prize on White Orpington hen, and J. A. Keltz won first on a plate display and second on another.

Frank Rose has completed the contract on the town well and bids are soon to be let on the trenching for the system. The pipe has been contracted for and the standpipe is en route and to be up and completed by October 20.

R. J. Luke has moved into Mr. Sleppy's house recently vacated by Mr. Clementa of the Western Lumber & Supply Company, the company selling out to the Weed Lumber Company.

Buck Carlisle and family of Ashland visited with Mr. and Mrs. H. C. Johnson, Sunday.

Mrs. Works has moved into the N. O. Powers house, having quit the hotel business that she has been running near the depot.

The socialists gave a public meeting Sunday afternoon. Mr. Decquer was the chief orator.

Taylor's hay press has been shipped to Coles, Cal., where they will bale hay for Rufe Cole and others. They have gasoline power and have been baling here for about a month. The crew drove over the Siskiyou in wagons.

A. M. Helms sold his place close to Talent a few days ago.

COURSES IN RESIDENCE at the University prepare for the Professions of ENGINEERING, JOURNALISM, LAW, MEDICINE, and TEACHING. Fall semester opens Tuesday, September 17. Address the Registrar for catalogues descriptive of the College of Engineering, the College of Liberal Arts, the Schools of Education, Commerce, Law, Medicine, and Music.

## L. N. Judd TALENT, OREGON JACKSON COUNTY

### Orchards, Homes and Farms

In a Thriving Center in One of the Garden Spots of the Rogue River Valley.

Has for sale fruit, garden and alfalfa land. Tracts from 5 to 1,000 acres; also timber land, a lively stable, lots in Talent, Medford and Ashland. Write, enclosing stamp, or, better still, come and examine.

## Land for Sale!

74-acre tract, good house and barn, 2 miles from Talent, on rural mail route; telephone in house; 1/4 mile from school; bearing trees; 8 acres in alfalfa. Do not have to sell, but if a person is looking for an all-round place this is hard to beat for the price, \$6,000.00.

91-acre tract, part of which is in the town limits of Talent, and an ideal place to cut into town lots or acre tracts and larger tracts. All good land and mostly under irrigation. This is a good chance for the right man. Will be glad to show interested parties over this proposition any time. Talent is the town that is doing it now.

Large or small tracts, close in or well out; fruit, farms, dairy, alfalfa or, in fact, any kind of lands. If interested call on or write
